

# Expedite Your Lease Accounting While Minimizing Errors

LeaseCrunch's simple, cloud-based software makes it easy to implement the new lease standards without having to worry about overcomplicated systems and inaccurate calculations.

## Cost Effective

LeaseCrunch provides a return on investment for even one lease, reducing the time-consuming complexity of lease accounting with automated footnote disclosures and data error checks.

## Time Saving

Get policy election templates and auto-generated, error-free amortization schedules and journal entries, all in a user interface designed for simplicity and speed.

## Intuitive

Step-by-step wizards and tooltips like professionally written summaries of the lease standards and considerations help you complete accurate calculations.

## Collaborative

Our software allows simultaneous client and CPA firm access for collaborative implementation and ongoing lease accounting support.

# Making Lease Accounting Simple

Software that makes lease accounting easy and fast

## + Simple

You don't have to be a lease accounting expert with our in-app wizards and context-sensitive help and tooltips to expedite the required deliverables.

## + Efficient

Leases can be entered in minutes manually or by using the bulk import feature, which significantly reduces time and complexity.

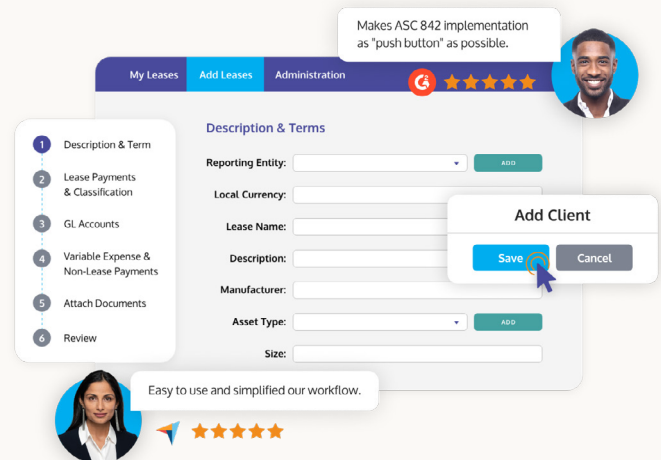

## + Comprehensive

Get everything from your quantitative footnote disclosure, a full amortization schedule and journal entries with the press of a button.

## + Accurate

Be confident in your calculations and know that your data is secure thanks to our internal controls, Agreed-Upon Procedures report, and SOC 1 Type II and SOC 2 Type II reports.

With LeaseCrunch, you'll never have to choose between fast and accurate, our automated lease accounting software does it all.
