

Expedite Your Clients' Lease Accounting While Minimizing Errors

LeaseCrunch's simple, cloud-based software makes it easy for CPA firms and companies to implement lease standards without having to worry about overcomplicated systems and inaccurate calculations.

Cost Effective

LeaseCrunch provides a return on investment for even one lease, reducing the time-consuming complexity of lease accounting with automated footnote disclosures and data error checks.

Time Saving

Get policy election templates and auto-generated, error-free amortization schedules and journal entries, all in a user interface designed for simplicity and speed.

Intuitive

Step-by-step wizards and tooltips like professionally written summaries of the lease standards and considerations help you complete accurate calculations.

Collaborative

Our software allows simultaneous client and CPA firm access for collaborative implementation and ongoing lease accounting support.

Making Lease Accounting Simple

The easiest lease accounting software for you and your clients

+ Simple

View all clients within a single dashboard plus use in-app wizards and context-sensitive help and tooltips to expedite audits.

+ Efficient

Leases can be entered in minutes manually or by using the bulk import feature, which significantly reduces time and complexity.

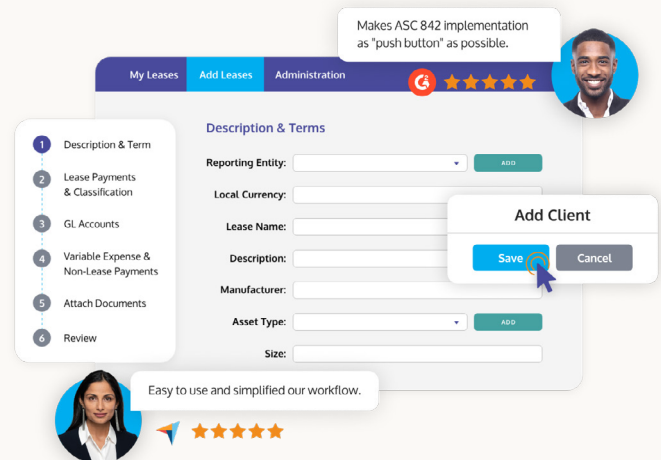

+ Comprehensive

Audit everything from short-term and long-term lease liabilities, to amortization expenses, re-measurement calculations for revised leases, and more.

+ Accurate

Be confident in your calculations and know that your data is secure thanks to our internal controls, Agreed-Upon Procedures report, and SOC 1 Type II and SOC 2 Type II reports.

With LeaseCrunch, you'll never have to choose between fast and accurate, our automated lease accounting software does it all.
